MACHINE LEARNING BASED VEHICLE PERFORMANCE ANALYZER

PROJECT OBJECTIVES:

The objective of this project is to analyze the vehicle performance of vehicle using machine learning.

PURPOSE OF PROJECT:

The main aim of the project is to find the relation between properties like acceleration, weight, no. of cylinders, etc and the mileage of a vehicle. It can be used to design better energy efficient vehicles for the future.

TECHNOLOGIES USED:

Python, IBM Cloud, IBM Watson, IBM Cloud and DB, Machine Learning, Python Flask
